PROFILE

Passionate cybersecurity student pursuing a Bachelor of Computer Science (Cyber Security, Hons.) at Asia Pacific University, with a strong interest in offensive security, penetration testing, network defense, and digital forensics. Experienced in solving Capture The Flag (CTF) challenges, administering Linux systems, and building practical security projects through hands-on labs and certifications. Aiming to help secure digital infrastructure while growing into a skilled security professional.

EDUCATION

Bachelor of Computer Science (Honours) in Cyber Security

In Progress

Asia Pacific University (APU)

Relevant coursework: Network Security, Ethical Hacking, Linux Administration, Secure Programming, Digital Forensics, Computer Networks, Operating Systems, Cryptography, Web Security, Software Engineering

TECHNICAL SKILLS

Cybersecurity	Penetration Testing, Vulnerability Assessment, Ethical Hacking, Web Security, Linux Security, Digital Forensics, Network Security, Security Awareness, Incident Analysis
Networking	Routing & Switching, TCP/IP, DNS, DHCP, VLAN, Network Troubleshooting
Programming	Python, Java, C, C++
Operating Systems	Linux (Kali, Debian), Windows
Tools	Kali Linux, Burp Suite, Wireshark, Nmap, Metasploit, Nessus, SQLMap, Hydra, Gobuster, Nikto, Git, VS Code, VirtualBox, VMware

PROJECTS

Network Vulnerability Scanner — Custom Python-based scanner that identifies open ports, service versions, and known vulnerabilities across a target network.

Web Security Assessment Toolkit — Scripts and workflows for assessing common web vulnerabilities such as SQL injection, XSS, and misconfigurations using Burp Suite and SQLMap.

Memory and Disk Forensics — Digital forensics case study performing memory-dump and disk-image analysis to reconstruct attacker activity and recover artifacts.

Malware Analysis Lab — Isolated lab environment for static and dynamic analysis of malware samples using sandboxing and behavioral monitoring.

Resume Ranking System using Sentence-BERT — Semantic resume-screening tool that ranks candidates against job descriptions using Sentence-BERT embeddings and cosine similarity.

CERTIFICATIONS

- | | |
|--|--|
| • Ethical Hacker — Cisco Networking Academy | • Introduction to Networks — Cisco Networking Academy |
| • Routing and Switching Essentials — Cisco Networking Academy | • Getting Started in Cybersecurity — Fortinet |

ACHIEVEMENTS & ACTIVITIES

- | | |
|--|---|
| • 1st Position – Forbes College Ideathon | • CTF Participant – Hack Astra |
| • Participant – Codefest 2025 | • Conducted Cybersecurity Awareness Program |
| • Hackathon Participant | • National Cadet Corps (NCC) Participant |
